Bamboo Bedroom Furniture Manufacturers

Bamboo Bed

The classic color of bamboo with clearly visible texture, the natural texture of the original bamboo can not be reproduced. Made of 100% pure natural bamboo material, which can avoid the formaldehyde problem from the source. Thickened bedhead and bedside make the bed stable and durable with strong deformation ability and long service life.

The double horizontal bracket is arranged scientifically, making uniform force vertically and horizontally. The bearing force of the bed is strong. This bed is strong, breathable, environmentally friendly, and healthy. With a round arc design, the bedside is treated with rounding, so there is no risk of colliding, which not only owns a beautiful appearance but also can achieve protection function.

Bamboo Bedside Table

Made of 100% pure natural bamboo material, it adopts zero formaldehyde environmental protection glue produced in Europe and high standard environmental protection varnish, which can avoid the formaldehyde problem from the source! Besides, it has the function of absorbing ultraviolet rays, making your eyes more comfortable and preventing myopia. It also has the function of sound insulation, which makes our house quieter. A high-quality buffer slide is used, so the

drawer can be easily pulled out and slowly closed, which is both practical and safe. The height is appropriate to match the bed, it is just right to put a lamp on it.

[Long Cabinet](#)

The classic color of bamboo with clearly visible texture, the natural texture of the original bamboo can not be reproduced. Made of 100% pure natural bamboo material, which can avoid the formaldehyde problem from the source. It adopts high-standard varnish, which is environmentally friendly and durable. With a round arc design, the bedside is treated with rounding, so there is no risk of colliding, which not only owns a beautiful appearance but also can achieve protection function. A high-quality buffer slide is used, so the drawer can be easily

pulled out and slowly closed. With the three-layer and six-drawer design, it can achieve a larger storage space!

Tall Cabinet

The classic color of bamboo with clearly visible texture, the natural texture of the original bamboo can not be reproduced. Made of 100% pure natural bamboo material, which can avoid the formaldehyde problem from the source. It adopts high-standard varnish, which is environmentally friendly and durable. With a round arc design, the bedside is treated with rounding, so there is no risk of colliding, which not only owns a beautiful appearance but also can achieve protection function. A high-quality buffer slide is used, so the drawer can be easily pulled out and slowly closed.

Bamboo Hat Rack

It adopts 100% pure natural bamboo and high-standard varnish, which is environmentally friendly and durable. It uses the traditional plug-in structure and spiral connecting way with no screw connectors.

It adopts 100% pure natural bamboo and high-standard varnish, which is environmentally friendly and durable. With a four-legged tripod design, the foot and the rod are connected by the embedded tooth screws, which are firm and stable! The hook is fixed to the rod with self-tapping screws with good strength, which allows the hanging weight of more than a dozen cities.

Bamboo Rack

The rack is made of more than 5 years of high mountain natural bamboo.

After high-temperature carbonization treatment, the surface was performed with a mildew repellent, with environmental protection PU varnish, to achieve the effect of mildew prevention! The edges and corners have been carefully polished, presenting a natural and simple style.

The towel chair rack is made of more than 5 years of high mountain natural bamboo.

Bamboo Bathtub Rack

The bathtub rack is made of more than 5 years of high mountain natural bamboo. After high-temperature carbonization treatment, the surface was performed with a mildew repellent, with environmental protection PU varnish, to achieve the effect of mildew prevention! The edges and corners have been carefully polished, presenting a natural and simple style.

Bamboo Office Lap Desk

Due to different textures and patterns, each table is unique. The tabletop and table legs are made of natural bamboo materials, bringing a warm and natural feeling to the room. Bamboo is a purely natural material that is wear-resistant. Covered with protective varnish on the surface, it makes the desk more wear-resistant and maintains the natural bamboo texture. Each leg is reasonably matched, which is easy to assemble with a stable structure.
